

RESTOR BIG DROPS

Indications

Restor BIG is the first and only pediatric multivitamin and mineral drops with Taurine, Chlorella, Folic Acid, Zinc, Iron, Iodine, Biotin and Panthenol and other essential vitamins and minerals to support the child's Brain development, healthy Immune system and Growth enhancement.

What's good about RESTOR BIG Drops...

Chlorella powder contains 4 major components: (1) Chlorophyll, contains heme for CP450 formation and fibroblast production; (2) Cell Wall, essential for macrophage stimulation, helpful in promoting normal peristalsis, detoxifying poisons within the intestines and for the growth of healthy bacteria; (3) Chlorella growth factor, reported to cause vertical growth due to the high nucleic acid content specifically adenosine and cytidine nucleotide; (4) Beta-carotene helps to boost the child's immunity and improve normal vision.

Iron Polymatose Complex has the same bioavailability as ferrous sulfate (20% elemental iron) without the undesirable side effects (eg: staining of the teeth, gastric irritation, absorption antagonism with Copper and Zinc, food and milk). It is also the best tasting iron preparation in the market with minimal metallic after taste.

Folic Acid is beneficial during period of rapid cell division and growth not only during pregnancy but also in infancy. Folic acid may be required in low birth weight infants, infants breast-fed by folic acid-deficient mother, or those with prolonged diarrhoea and infection.

Zinc acts as one of the principal protector of the immune system and is a major disease fighter, necessary for patients with diarrhoea and acute lower respiratory tract infection.

Taurine promotes keen senses by influencing nerve blood flow, motor nerves conduction and nerve sensory threshold. Deficiency leads to cerebral dysfunction and decreases auditory brain stem evoked response.

Iodine is a micronutrient essential for the production of thyroid hormone. Deficiency may lead to cretinism and stunted growth.

Dosage

0-6 months: 1 mL daily

7-24 months: 2 mL daily

Or as prescribed by the physician

Storage Condition

Store at temperatures not exceeding 30° C.
Shake bottle before use.

Availability

Available in amber bottle of 30mL.

Manufactured by:

Lloyd Laboratories, Inc.

#10 Lloyd Avenue

First Bulacan Industrial City

Malolos, Bulacan

ISO 9001-2000 Certified

For:
